

Windows 10

If you're using Windows 10, the following steps will guide you through setting up your PC for accessing teeone. All files required for installation can be found at

<http://support.teeone.net/support/downloads.asp>

Click on "teeone connector 12/08" and you will see a dialog box asking if you want to Open or Save this file - Choose Save and place the file on your Desktop.

Logging On

Double-click the teeone icon on your Desktop.

Enter the computer name and click Connect. Your office manager should have this information or contact Tech Support at 904.425.0183 option 1.

If you see a security warning: Click on "Don't ask me again" and click Continue or Connect.

The program connects to the server and a logon box is displayed. Enter the user name and password and click OK to log on to the server.

If you see a different security warning: Click on "Don't ask me again" and click Yes.

Once logged on, you will have a Start button to click on. From there, you can run the programs that are available on the server.

When you are finished, don't click the X to close the window Be sure to click the Start button and choose Log off. Users who click the on X have reported occasional data corruption issues.
